# LATEX EDITOR PROJECT

## DESIGN RECOVERY AND QUALITY ASSESSMENT REPORT

VERSION <2.0>

<Άγγελος Κατσαλήρος 2997

Δημήτριος Μπακάλης 3033>

# TABLE OF CONTENTS

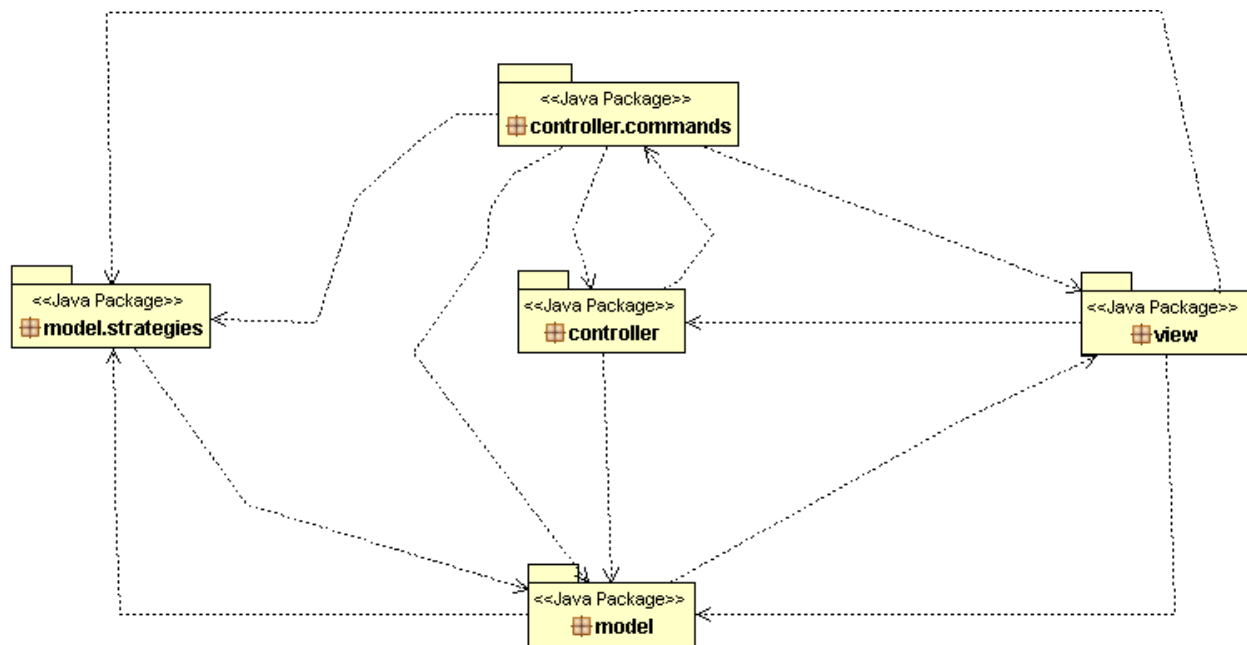

Introduction	4
Design Recovery	4
Architecture	4
Detailed Design	4
Implementation	9
Quality Assessment	30

## INTRODUCTION

The purpose of this phase is to understand the function of each individual class from the 5 packages, of the project, and how they interact with each other. We also going to demonstrate the uml package diagram as well as the uml class diagrams of each package.

## DESIGN RECOVERY

## ARCHITECTURE

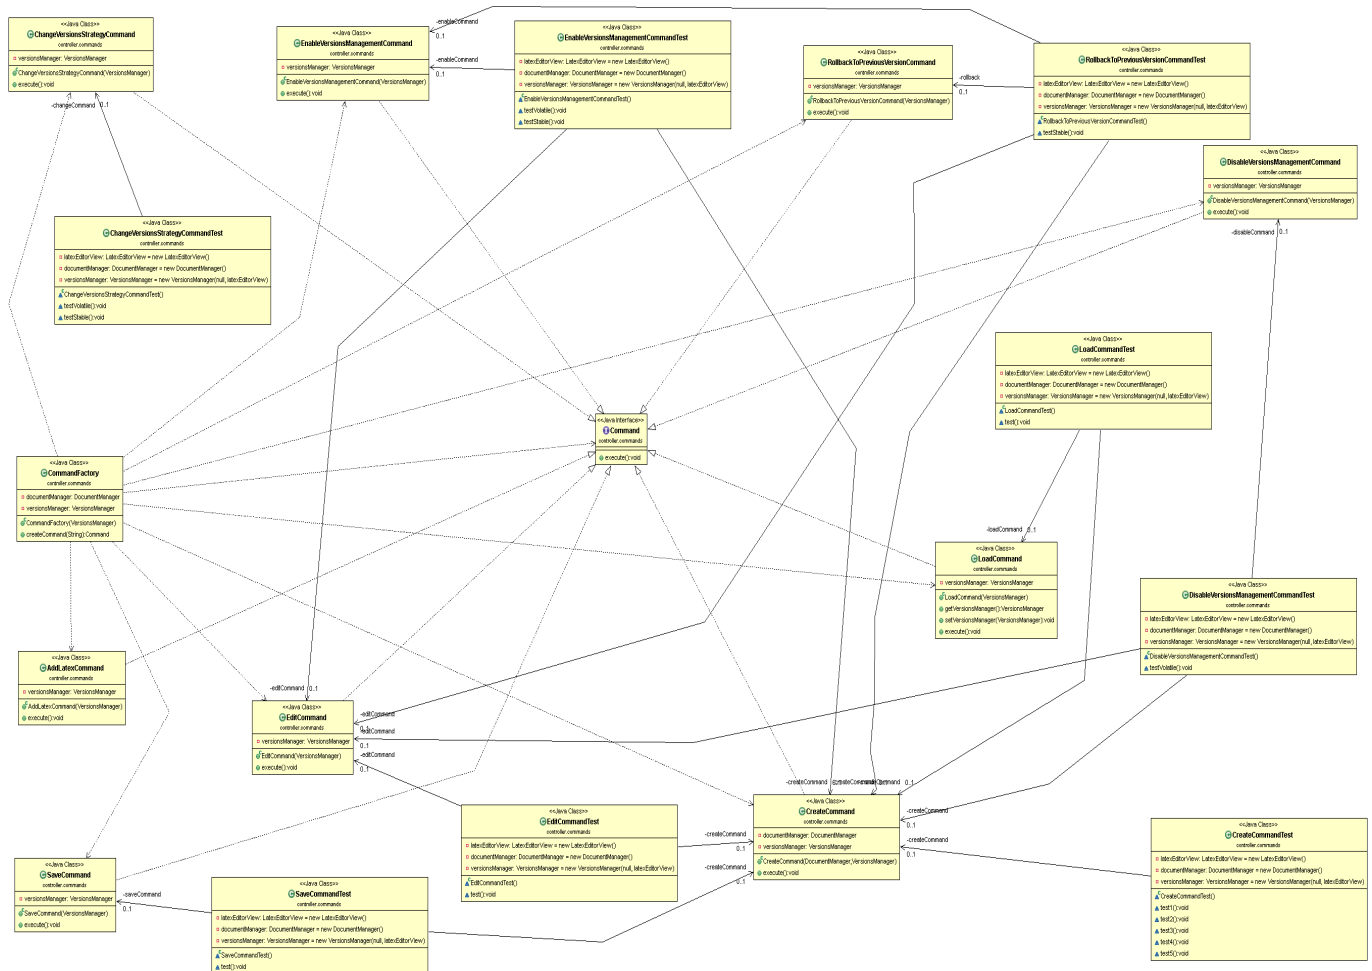

## DETAILED DESIGN

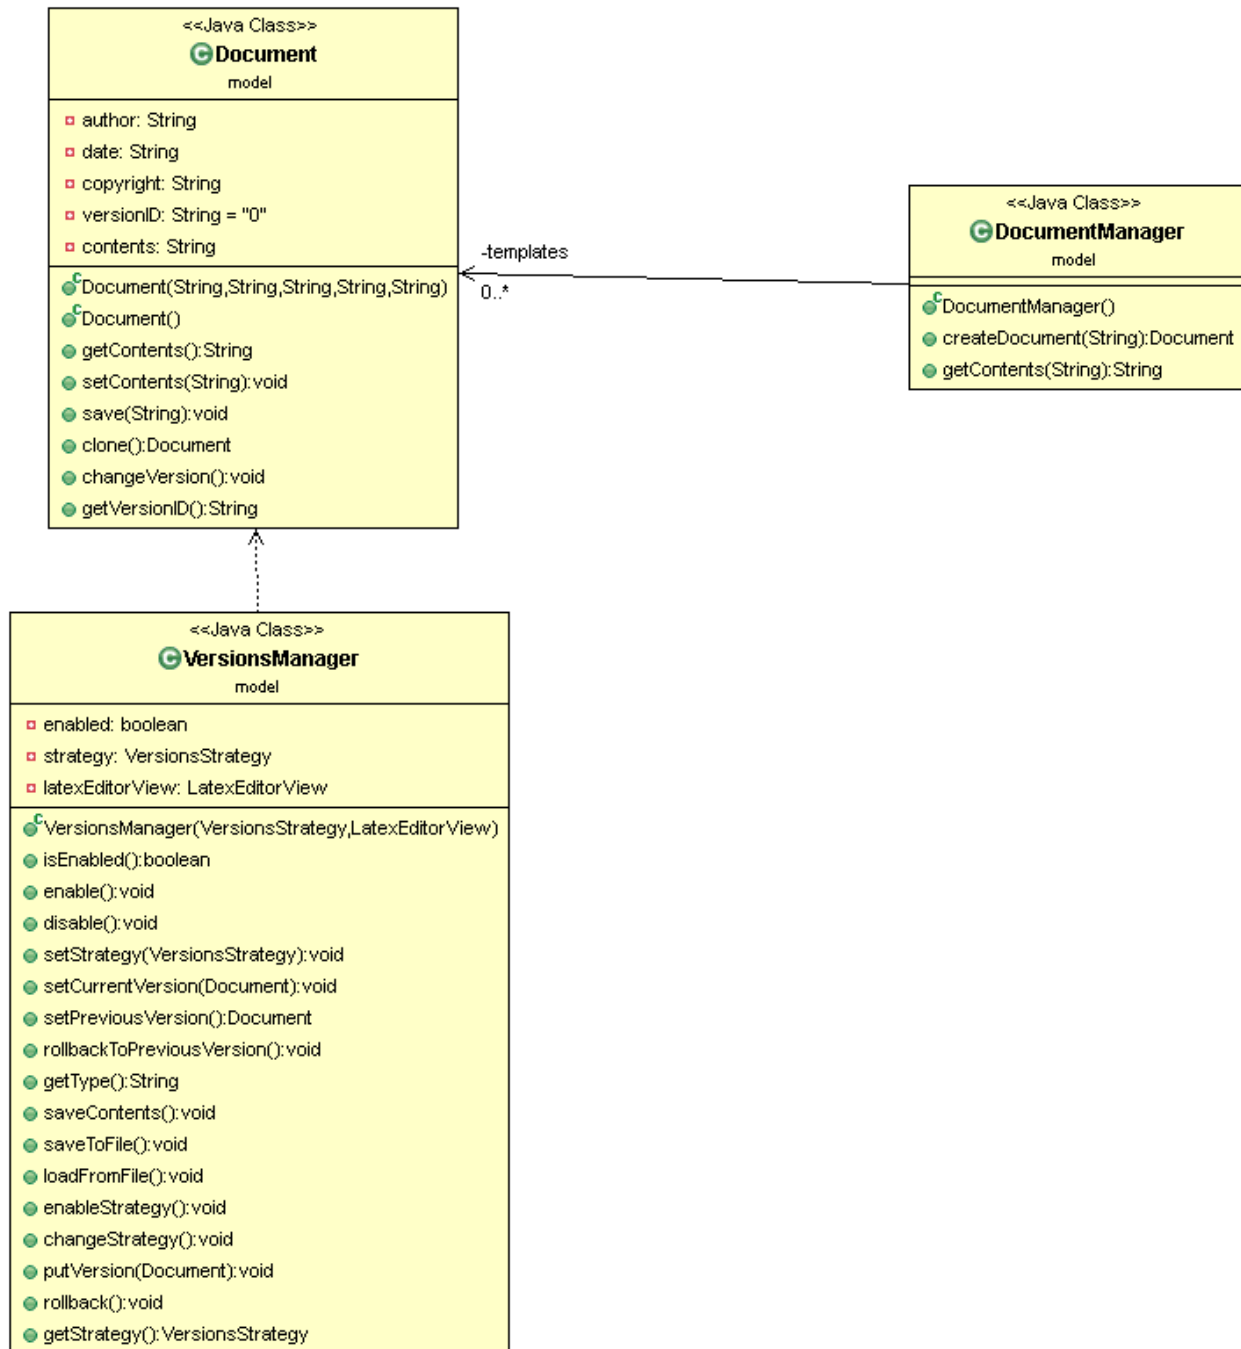

UML class diagram for the package controller:

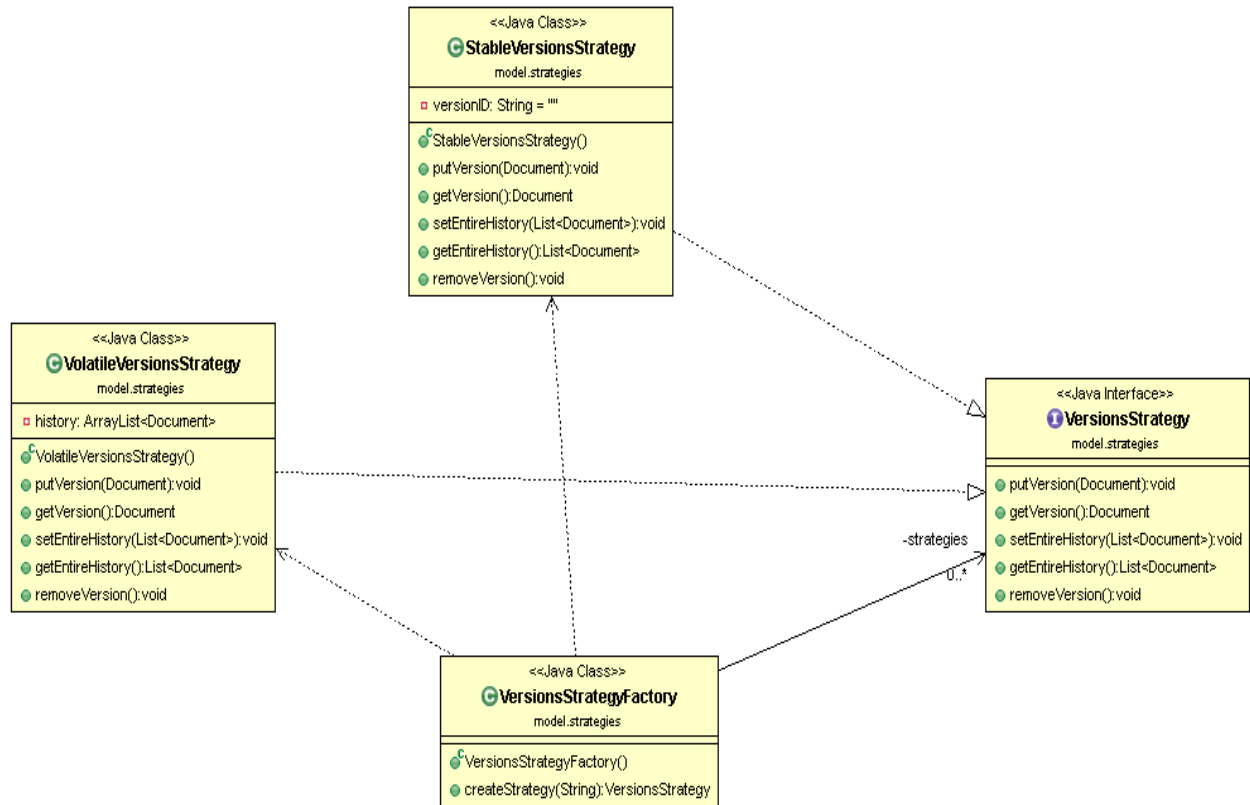

UML class diagram for the package controller.commands:

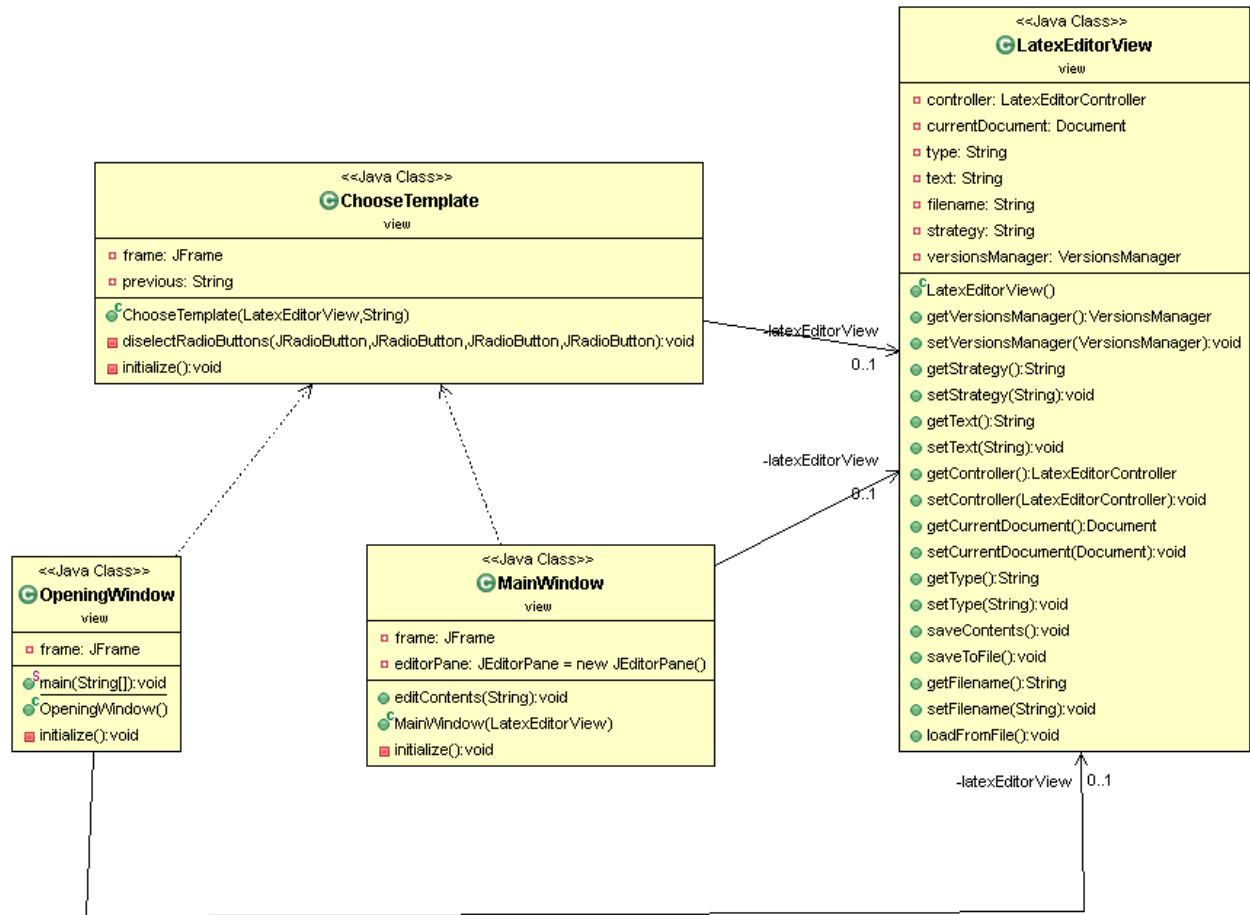

UML class diagram for the package model:

UML class diagram for the package model.strategies:

UML class diagram for the package view:

## IMPLEMENTATION

Class Name: LatexEditorController	
Responsibilities	Collaborations
<ul style="list-style-type: none"> <li>○ <u>This class is responsible for executing the required action by calling the “execute” method of the Command object.</u></li> <li>○ <u>This class creates a HashMap and stores the various Commands in it.</u></li> </ul>	<ul style="list-style-type: none"> <li>▪ <u>CommandsFactory</u></li> <li>▪ <u>Command</u></li> </ul>

Class Name: Command	
Responsibilities	Collaborations
<ul style="list-style-type: none"> <li>○ <u>This class is responsible for creating an interface, that implements the Command Pattern.</u></li> </ul>	<ul style="list-style-type: none"> <li>▪ <u>AddLatexCommand</u></li> <li>▪ <u>ChangeVersionStrategyCommand</u></li> <li>▪ <u>CommandFactory</u></li> <li>▪ <u>CreateCommand</u></li> <li>▪ <u>DisableVersionsManagementCommand</u></li> </ul>

	<ul style="list-style-type: none"> <li>▪ <u>EditCommand</u></li> <li>▪ <u>EnableVersionsManagmentCommand</u></li> <li>▪ <u>LoadCommand</u></li> <li>▪ <u>RollBackToPreviousVersionCommand</u></li> <li>▪ <u>SaveCommand</u></li> </ul>
--	--

Class Name: CommandFactory	
Responsibilities	Collaborations
<ul style="list-style-type: none"> <li>○ <u>This class creates a method “createCommand” that creates and returns a specific Command object.</u></li> </ul>	<ul style="list-style-type: none"> <li>▪ <u>AddLatexCommand</u></li> <li>▪ <u>ChangeVersionStrategyCommand</u></li> <li>▪ <u>CommandFactory</u></li> <li>▪ <u>CreateCommand</u></li> <li>▪ <u>DisableVersionsManagementCommand</u></li> <li>▪ <u>EditCommand</u></li> <li>▪ <u>EnableVersionsManagmentCommand</u></li> <li>▪ <u>LoadCommand</u></li> </ul>

	<ul style="list-style-type: none"> <li>▪ <u>RollBackToPreviousVersionCommand</u></li> <li>▪ <u>SaveCommand</u></li> <li>▪ <u>DocumentManager</u></li> <li>▪ <u>VersionsManager</u></li> </ul>
--	---

Class Name: CreateCommand	
Responsibilities	Collaborations
<ul style="list-style-type: none"> <li>○ <u>This class creates a method “createCommand” that creates and returns a specific Command object.</u></li> </ul>	<ul style="list-style-type: none"> <li>▪ <u>CommandFactory</u></li> <li>▪ <u>Command</u></li> <li>▪ <u>CreateCommandTest</u></li> <li>▪ <u>DisableVersionsManagementCommandTest</u></li> <li>▪ <u>EditCommandTest</u></li> <li>▪ <u>EnableVersionsManagmentCommandTest</u></li> <li>▪ <u>LoadCommandTest</u></li> <li>▪ <u>RollBackToPreviousVersionCommandTest</u></li> <li>▪ <u>SaveCommandTest</u></li> </ul>

	<ul style="list-style-type: none"> <li>▪ <u>Document</u></li> <li>▪ <u>DocumentManager</u></li> <li>▪ <u>VersionsManager</u></li> </ul>
--	---

Class Name: CreateCommandTest	
Responsibilities	Collaborations
<ul style="list-style-type: none"> <li>○ <u>This class is responsible for testing the “CreateCommand” class, to ensure that it works properly.</u></li> </ul>	<ul style="list-style-type: none"> <li>▪ <u>LatexEditorView (form controller package)</u></li> <li>▪ <u>DocumentManager (from model package)</u></li> <li>▪ <u>CreateCommand</u></li> <li>▪ <u>VersionsManager (from model.strategies package)</u></li> </ul>

Class Name: EditCommand	
Responsibilities	Collaborations
<ul style="list-style-type: none"> <li>○ <u>This class implements from the Command interface.</u></li> <li>○ <u>This class is responsible for executing the method “saveContents” for a specific VersionsManager object.</u></li> </ul>	<ul style="list-style-type: none"> <li>▪ <u>CommandFactory</u></li> <li>▪ <u>Command</u></li> <li>▪ <u>DisableVersionsManagementCommandTest</u></li> <li>▪ <u>EditCommandTest</u></li> <li>▪ <u>EnableVersionsManagmentCommandTest</u></li> <li>▪ <u>RollBackToPreviousVersionCommandTest</u></li> <li>▪ <u>VersionsManager (from model.strategies package)</u></li> </ul>

Class Name: EditCommandTest	
Responsibilities	Collaborations
<ul style="list-style-type: none"> <li>○ <u>This class is responsible for testing the “EditCommand” class, to ensure that it works properly.</u></li> </ul>	<ul style="list-style-type: none"> <li>▪ <u>LatexEditorView (form controller package)</u></li> <li>▪ <u>DocumentManager (from model package)</u></li> <li>▪ <u>EditCommand</u></li> </ul>

	<ul style="list-style-type: none"> <li>▪ <u>VersionsManager</u> (from <u>model.strategies package</u>)</li> <li>▪ <u>CreateCommand</u></li> </ul>
--	---

Class Name: ChangeVersionStrategyCommand	
Responsibilities	Collaborations
<ul style="list-style-type: none"> <li>○ <u>This class implements from the Command interface.</u></li> <li>○ <u>This class is responsible for executing the method “changeStrategy” for a specific VersionsManager object.</u></li> </ul>	<ul style="list-style-type: none"> <li>▪ <u>CommandFactory</u></li> <li>▪ <u>Command</u></li> <li>▪ <u>ChangeVersionStrategyCommand</u></li> <li>▪ <u>VersionsManager</u> (from <u>model.strategies package</u>)</li> </ul>

Class Name: ChangeVersionStrategyCommandTest	
Responsibilities	Collaborations
	<ul style="list-style-type: none"> <li>▪ <u>LatexEditorView</u> (from <u>controller package</u>)</li> <li>▪ <u>DocumentManager</u> (from <u>model package</u>)</li> </ul>

<ul style="list-style-type: none"> <li>○ <u>This class is responsible for testing the “ChangeVersionStrategyCommand” class, to ensure that it works properly.</u></li> </ul>	<ul style="list-style-type: none"> <li>▪ <u>ChangeVersionStrategyCommand</u></li> <li>▪ <u>VersionsManager (from model.strategies package)</u></li> <li>▪ <u>VersionsStrategy</u></li> <li>▪ <u>VolatileVersionsStrategy</u></li> <li>▪ <u>StableVersionsStrategy</u></li> </ul>
--	--

Class Name: AddLatexCommand	
Responsibilities	Collaborations
<ul style="list-style-type: none"> <li>○ <u>This class implements from the Command interface.</u></li> <li>○ <u>This class is responsible for executing the method “saveContents” for a specific VersionsManager object.</u></li> </ul>	<ul style="list-style-type: none"> <li>▪ <u>CommandFactory</u></li> <li>▪ <u>Command</u></li> <li>▪ <u>VersionsManager (from model.strategies package)</u></li> </ul>

Class Name: SaveCommand	
Responsibilities	Collaborations
<ul style="list-style-type: none"> <li>○ <u>This class implements from the Command interface.</u></li> <li>○ <u>This class is responsible for executing the method “saveToFile” for a specific VersionsManager object.</u></li> </ul>	<ul style="list-style-type: none"> <li>▪ <u>CommandFactory</u></li> <li>▪ <u>Command</u></li> <li>▪ <u>SaveCommandTest</u></li> <li>▪ <u>VersionsManager (from model.strategies package)</u></li> </ul>

Class Name: SaveCommandTest	
Responsibilities	Collaborations
<ul style="list-style-type: none"> <li>○ <u>This class is responsible for testing the “SaveCommand” class, to ensure that it works properly.</u></li> </ul>	<ul style="list-style-type: none"> <li>▪ <u>LatexEditorView (form controller package)</u></li> <li>▪ <u>DocumentManager (from model package)</u></li> <li>▪ <u>SaveCommand</u></li> </ul>

	<ul style="list-style-type: none"> <li>▪ <u>VersionsManager (from model.strategies package)</u></li> <li>▪ <u>CreateCommand</u></li> </ul>
--	--

Class Name: LoadCommand	
Responsibilities	Collaborations
<ul style="list-style-type: none"> <li>○ <u>This class implements from the Command interface.</u></li> <li>○ <u>This class is responsible for executing the method “loadFromFile” for a specific VersionsManager object.</u></li> <li>○ <u>This class is creating a “getVersionManger” method that is responsible for returning the created VersionsManager object.</u></li> <li>○ <u>This class is creating a “setVersionManger” method that is responsible for changing the value of the created VersionsManager object to a “new” one.</u></li> </ul>	<ul style="list-style-type: none"> <li>▪ <u>CommandFactory</u></li> <li>▪ <u>Command</u></li> <li>▪ <u>LoadCommandTest</u></li> <li>▪ <u>VersionsManager (from model.strategies package)</u></li> </ul>

Class Name: LoadCommandTest	
Responsibilities	Collaborations
<ul style="list-style-type: none"> <li>○ <u>This class is responsible for testing the “LoadCommand” class, to ensure that it works properly.</u></li> </ul>	<ul style="list-style-type: none"> <li>▪ <u>LatexEditorView (form controller package)</u></li> <li>▪ <u>DocumentManager (from model package)</u></li> <li>▪ <u>LoadCommand</u></li> <li>▪ <u>VersionsManager (from model.strategies package)</u></li> <li>▪ <u>CreateCommand</u></li> </ul>

Class Name: DisableVersionsManagementCommand	
Responsibilities	Collaborations
<ul style="list-style-type: none"> <li>○ <u>This class implements from the Command interface.</u></li> </ul>	<ul style="list-style-type: none"> <li>▪ <u>CommandFactory</u></li> <li>▪ <u>Command</u></li> <li>▪ <u>DisableVersionsManagementCommandTest</u></li> </ul>

<ul style="list-style-type: none"> <li>○ <u>This class is responsible for executing the method “loadFromFile” for a specific VersionsManager object.</u></li> <li>○ <u>This class is creating a “disable” method that is responsible for returning the created VersionsManager object.</u></li> </ul>	<ul style="list-style-type: none"> <li>▪ <u>VersionsManager (from model.strategies package)</u></li> </ul>
---	--

Class Name: DisableVersionsManagementCommandTest	
Responsibilities	Collaborations
<ul style="list-style-type: none"> <li>○ <u>This class is responsible for testing the “DisableVersionsManagemetCom mand” class, to ensure that it works properly.</u></li> </ul>	<ul style="list-style-type: none"> <li>▪ <u>LatexEditorView (form controller package)</u></li> <li>▪ <u>DocumentManager (from model package)</u></li> <li>▪ DisableVersionsManagementCom mand</li> </ul>

	<ul style="list-style-type: none"> <li>▪ <u>VersionsManager (from model.strategies package)</u></li> <li>▪ <u>CreateCommand</u></li> <li>▪ <u>EditCommand</u></li> <li>▪ <u>VersionsStrategy</u></li> <li>▪ <u>VolatileVersionsStrategy</u></li> <li>▪ <u>StableVersionsStrategy</u></li> </ul>
--	---

Class Name: RollBackToPreviousVersionCommand	
Responsibilities	Collaborations
<ul style="list-style-type: none"> <li>○ <u>This class implements from the Command interface.</u></li> <li>○ <u>This class is responsible for executing the method “rollback” for a specific VersionsManager object.</u></li> </ul>	<ul style="list-style-type: none"> <li>▪ <u>CommandFactory</u></li> <li>▪ <u>Command</u></li> <li>▪ <u>RollBackToPreviousVersionCommandTest</u></li> <li>▪ <u>VersionsManager (from model.strategies package)</u></li> </ul>

Class Name: RollBackToPreviousVersionCommandTest	
Responsibilities	Collaborations
<ul style="list-style-type: none"> <li>○ <u>This class is responsible for testing the “RollBackToPreviousVersionCommand” class, to ensure that it works properly.</u></li> </ul>	<ul style="list-style-type: none"> <li>▪ <u>LatexEditorView (form controller package)</u></li> <li>▪ <u>DocumentManager (from model package)</u></li> <li>▪ <u>RollBackToPreviousVersionCommand</u></li> <li>▪ <u>VersionsManager (from model.strategies package)</u></li> <li>▪ <u>CreateCommand</u></li> <li>▪ <u>EditCommand</u></li> <li>▪ <u>EnableVersionsManagerCommand</u></li> <li>▪ <u>VersionsStartegy</u></li> <li>▪ <u>StableVersionsStrategy</u></li> </ul>

Class Name: EnableVersionsManagementCommand	
Responsibilities	Collaborations
<ul style="list-style-type: none"> <li>○ <u>This class implements from the Command interface.</u></li> <li>○ <u>This class is responsible for executing the method “enableStrategy” for a specific VersionsManager object.</u></li> </ul>	<ul style="list-style-type: none"> <li>▪ <u>CommandFactory</u></li> <li>▪ <u>Command</u></li> <li>▪ <u>EnableVersionsManagementCommandTest</u></li> <li>▪ <u>VersionsManager (from model.strategies package)</u></li> <li>▪ <u>RollBackToPreviousCommandTest</u></li> </ul>

Class Name: EnableVersionsManagementCommandTest	
Responsibilities	Collaborations
<ul style="list-style-type: none"> <li>○ <u>This class is responsible for testing the “EnableVersionsManagemetCom mand” class, to ensure that it works properly.</u></li> </ul>	<ul style="list-style-type: none"> <li>▪ <u>LatexEditorView (form controller package)</u></li> <li>▪ <u>DocumentManager (from model package)</u></li> <li>▪ <u>EnableVersionsManagementCom mand</u></li> </ul>

	<ul style="list-style-type: none"> <li>▪ <u>VersionsManager</u> (from <u>model.strategies package</u>)</li> <li>▪ <u>CreateCommand</u></li> <li>▪ <u>EditCommand</u></li> <li>▪ <u>VersionsStrategy</u></li> <li>▪ <u>VolatileVersionsStartegy</u></li> <li>▪ <u>StableVersionsStrategy</u></li> </ul>
--	--

Class Name: Document	
Responsibilities	Collaborations
<ul style="list-style-type: none"> <li>○ <u>This class is responsible for creating the Prototype Pattern using the “clone” method, that returns a clone Document.</u></li> </ul>	<ul style="list-style-type: none"> <li>▪ <u>DocumentManager</u></li> <li>▪ <u>VersionsManager</u></li> </ul>

<ul style="list-style-type: none"> <li>○ <u>This class can also “use” the contents of a specific Document through out the methods “getContents”, “setContents”, “save”, “changeVersion” and “getVersion”.</u></li> </ul>	
--	--

Class Name: DocumentManager	
Responsibilities	Collaborations
<ul style="list-style-type: none"> <li>○ <u>This class creates a HashMap and stores the various Template Prototypes in it.</u></li> <li>○ <u>This class is responsible for creating a method “createDocument”, that retrieves a Template Prototype from the HashMap and clones it, by calling the “clone” method.</u></li> </ul>	<ul style="list-style-type: none"> <li>▪ <u>Document</u></li> </ul>

Class Name: VersionsManager	
Responsibilities	Collaborations
<ul style="list-style-type: none"> <li>○ <u>This class is responsible for changing the “status” and the “contets” of the current Version through out the methods “isEnabled”, “enable”, “disable”, “setStrategy”, “setCurrentVersion”, “setPreviousVersion”, “rollbackToPreviousVersion”, “getType”, “saveContents”, “saveToFile”, “loadFromFile”, “enableStrategy”, “changeStrategy”, “putVersion”, “rollback”, “getStrategy”</u></li> </ul>	<ul style="list-style-type: none"> <li>▪ <u>Document</u></li> <li>▪ <u>VersionsStrategy (from model.strategies package)</u></li> <li>▪ <u>LatexEditorView (from view package)</u></li> </ul>

Class Name: VersionsStrategy	
Responsibilities	Collaborations
<ul style="list-style-type: none"> <li>○ <u>This class is responsible for creating an interface, that implements the Strategy Pattern.</u></li> </ul>	<ul style="list-style-type: none"> <li>▪ <u>Document</u></li> <li>▪ <u>VersionsStrategyFactory</u></li> <li>▪ <u>VolatileVersionsStrategy</u></li> <li>▪ <u>StableVersionsStrategy</u></li> </ul>

Class Name: VersionsStrategyFactory	
Responsibilities	Collaborations
<ul style="list-style-type: none"> <li>○ <u>This class creates a HashMap and stores the two type of Strategies in it.</u></li> <li>○ <u>This class is responsible for returning a specific strategy form the Hash map through the “createStrategy” method.</u></li> </ul>	<ul style="list-style-type: none"> <li>▪ <u>StableVersionsStrategy</u></li> <li>▪ <u>VersionsStrategy</u></li> <li>▪ <u>VolatileVersionsStrategy</u></li> </ul>

Class Name: VolatileVersionsStrategy	
Responsibilities	Collaborations
<ul style="list-style-type: none"> <li>○ <u>This class implements from the VersionsStrategy interface.</u></li> <li>○ <u>This class is responsible for changing and returning the contents of the specific Strategy Pattern through out the methods “putVersion”, “getVersion”, “setEntireHistory”, “getEntireHistory” and “removeVersion”.</u></li> </ul>	<ul style="list-style-type: none"> <li>▪ <u>VersionsStrategy</u></li> <li>▪ <u>VersionsStrategyFactory</u></li> <li>▪ <u>Document</u></li> </ul>
Class Name: StableVersionsStrategy	
Responsibilities	Collaborations
<ul style="list-style-type: none"> <li>○ <u>This class implements from the VersionsStrategy interface.</u></li> </ul>	<ul style="list-style-type: none"> <li>▪ <u>VersionsStrategy</u></li> <li>▪ <u>VersionsStrategyFactory</u></li> <li>▪ <u>Document</u></li> </ul>

<ul style="list-style-type: none"> <li>○ <u>This class is responsible for changing and returning the contents of the specific Strategy Pattern through out the methods “putVersion”, “getVersion”, “setEntireHistory”, “getEntireHistory” and “removeVersion”.</u></li> </ul>	
---	--

Class Name: LatexEditorView	
Responsibilities	Collaborations
<ul style="list-style-type: none"> <li>○ <u>This class is responsible for connecting the “view” package with the “controller” and “model” packages in order to use the various methods.</u></li> </ul>	<ul style="list-style-type: none"> <li>▪ <u>LatexEditorController</u></li> <li>▪ <u>VersionsManager</u></li> <li>▪ <u>MainWindow</u></li> <li>▪ <u>OpeningWindow</u></li> <li>▪ <u>ChooseTemplate</u></li> <li>▪ <u>Document</u></li> </ul>

Class Name: MainWindow	
Responsibilities	Collaborations
<ul style="list-style-type: none"> <li>○ <u>This class is responsible for creating the main UI window.</u></li> </ul>	<ul style="list-style-type: none"> <li>▪ <u>LatexEditorView</u></li> <li>▪ <u>ChooseTemplate</u></li> </ul>

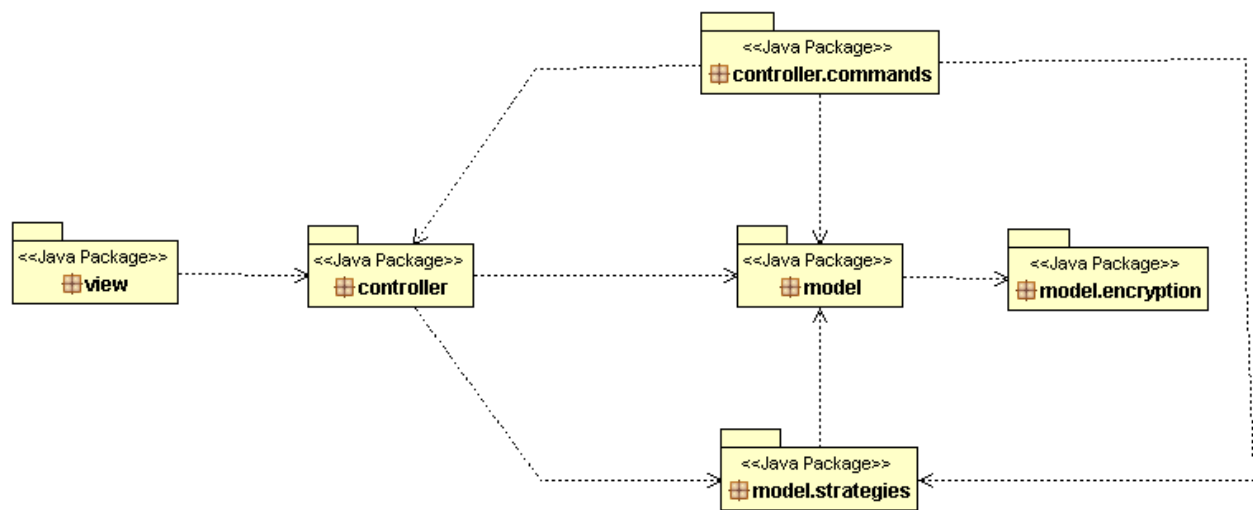

Class Name: OpeningWindow	
Responsibilities	Collaborations
<ul style="list-style-type: none"> <li>○ <u>This class is responsible for creating the first UI window, when the program is launched.</u></li> </ul>	<ul style="list-style-type: none"> <li>▪ <u>LatexEditorView</u></li> <li>▪ <u>VersionsStrategy</u></li> <li>▪ <u>VolatileVersionsStrategy</u></li> <li>▪ <u>VersionsManager</u></li> <li>▪ <u>LatexEditorController</u></li> <li>▪ <u>ChooseTemplate</u></li> </ul>

Class Name: ChooseTemplate	
Responsibilities	Collaborations
<ul style="list-style-type: none"> <li>○ <u>This class is responsible for creating the second UI window, to choose from the various Templates.</u></li> </ul>	<ul style="list-style-type: none"> <li>▪ <u>LatexEditorView</u></li> <li>▪ <u>MainWindow</u></li> <li>▪ <u>OpeningWindow</u></li> </ul>

## QUALITY ASSESSMENT

- At the constructor of the class LatexEditorController we detect duplicated code for inserting the different type of Commands into the HashMap named “commands”.
- We detect that, at the Command classes, we have the same fields such as “VersionsManager” and “DocumentManager”.
- At the constructor of DocumentManager class, we detect duplicated code for inserting the different type of Templates into the “templates” HashMap.
- We detect that the method “getContents” of the DocumentManager class has really long code.
- In every test, for the classes ---Command, we detect that the main ---Command object, instead of being created by the CommandFactory class, it is created as stand alone.

- We detect that in the MainWindow class we have a method, “editContents” that is shouldn’t be there because of the nature of the MainWindow class that creates the main GUI Window. The method “editContets” has to do with the contents of a Document.
- We can see that the VersionsManager class is really long, in terms of functions, and does some functions through it’s methods such as “saveToFile” that is shouldn’t be able to do.
- In the VersionsManager class, we detect that the methods “changeStrategy” and “enableStrategy” have very complicated if statements.
- We detect that the VersionsManager class has some methods such as “getType”, “saveToFile”, “loadFromFile” etc that are used also in the LatexEditorView class.
- We detect that, in the VersionsManager class, we have some methods that do nothing. Like “rollbackToPreviousVersion”.
- We can see that the class LatexEditorView has some methods like “saveToFile”, “loadFromFile” etc that are not supposed to be there, due to the fact that this class is repsonisble for managing the GUI and not managing the contents of the current document.
- In the StableVersionsStrategy class, we detect that the method “setEntireHistroy” uses a variable with the name “i”. The same happens with the “getEntireHistory” and additionally we detect that an ArrayList is initialized as “List”.
- We detect that we have unnecessary comments at various classes of the project with the name “**TODO** Auto-generated method stub”.

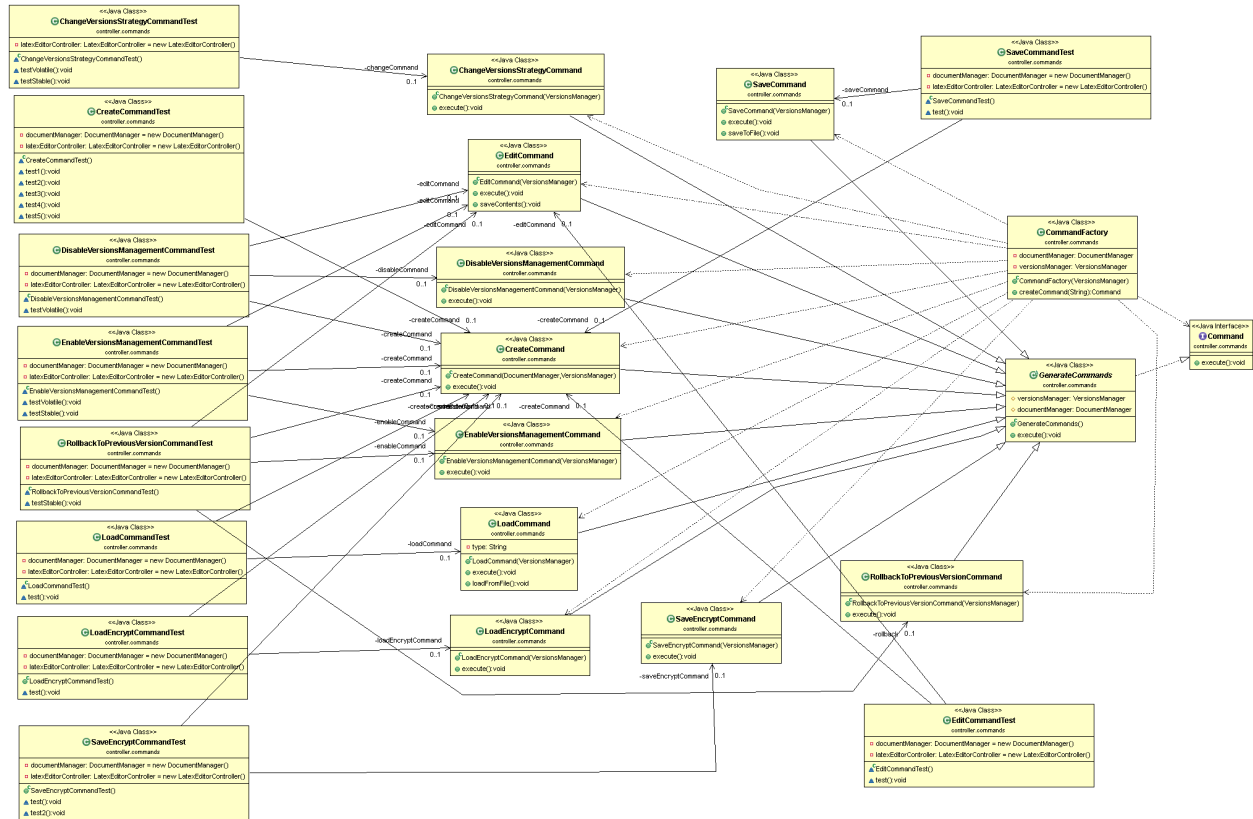

## DETAILED DESIGN

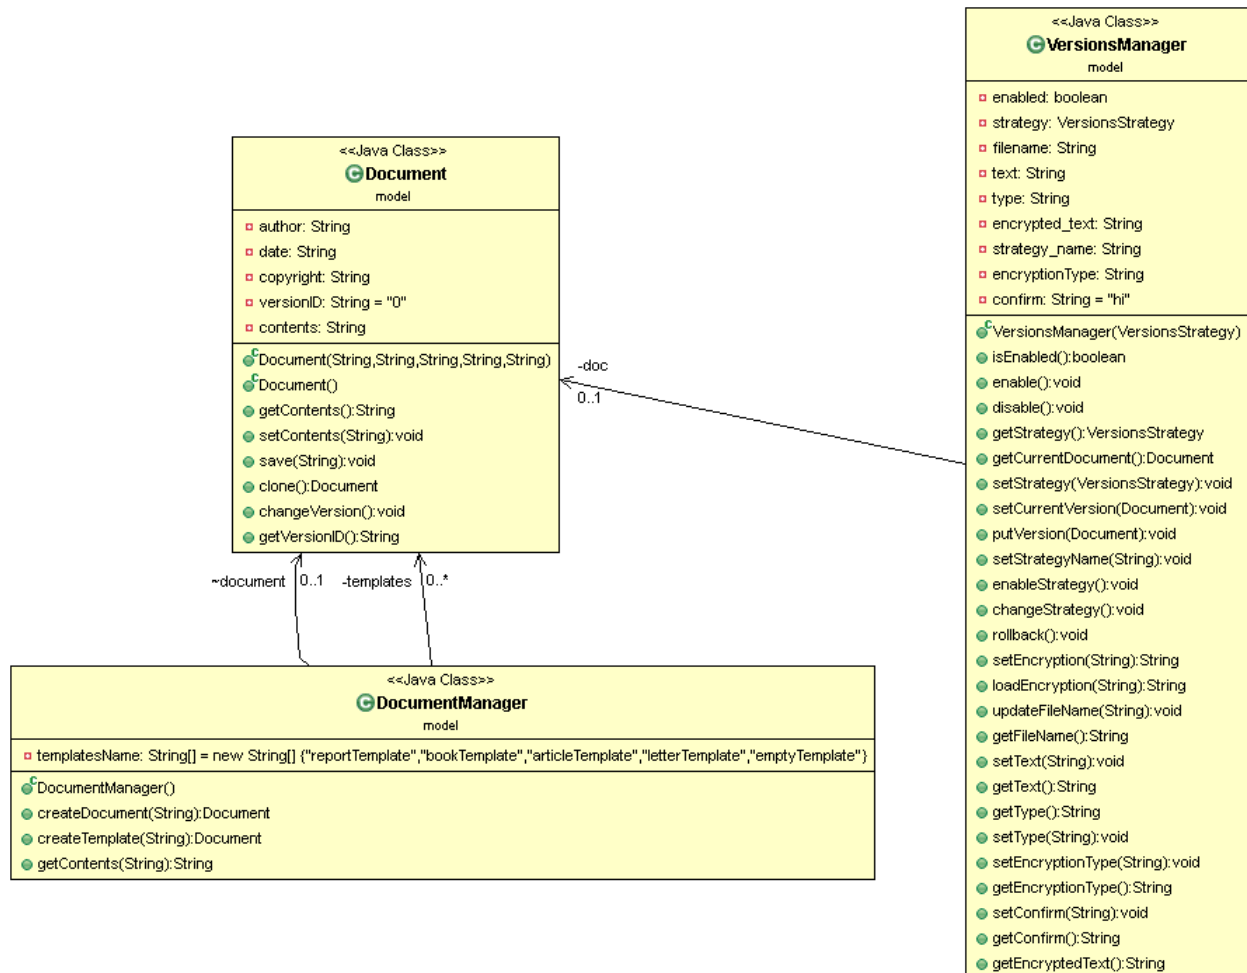

UML class diagram for the package controller:

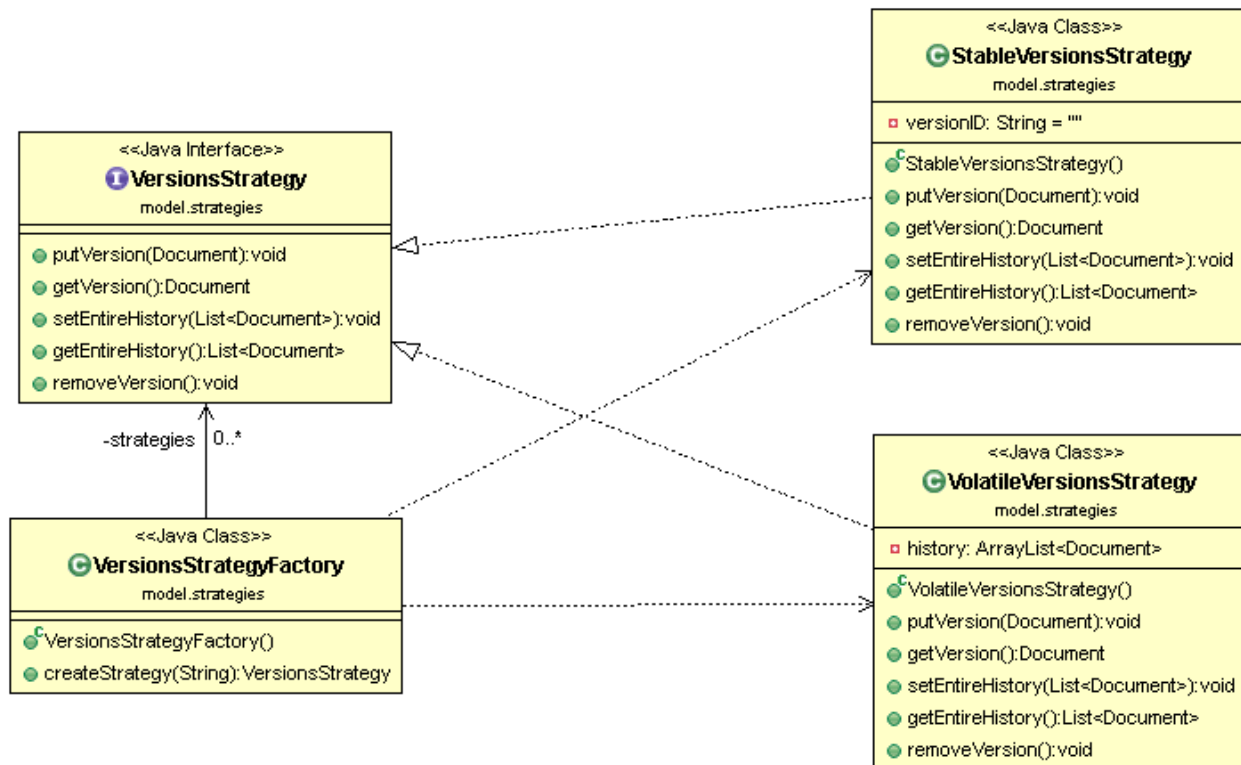

## UML class diagram for the package controller.commands:

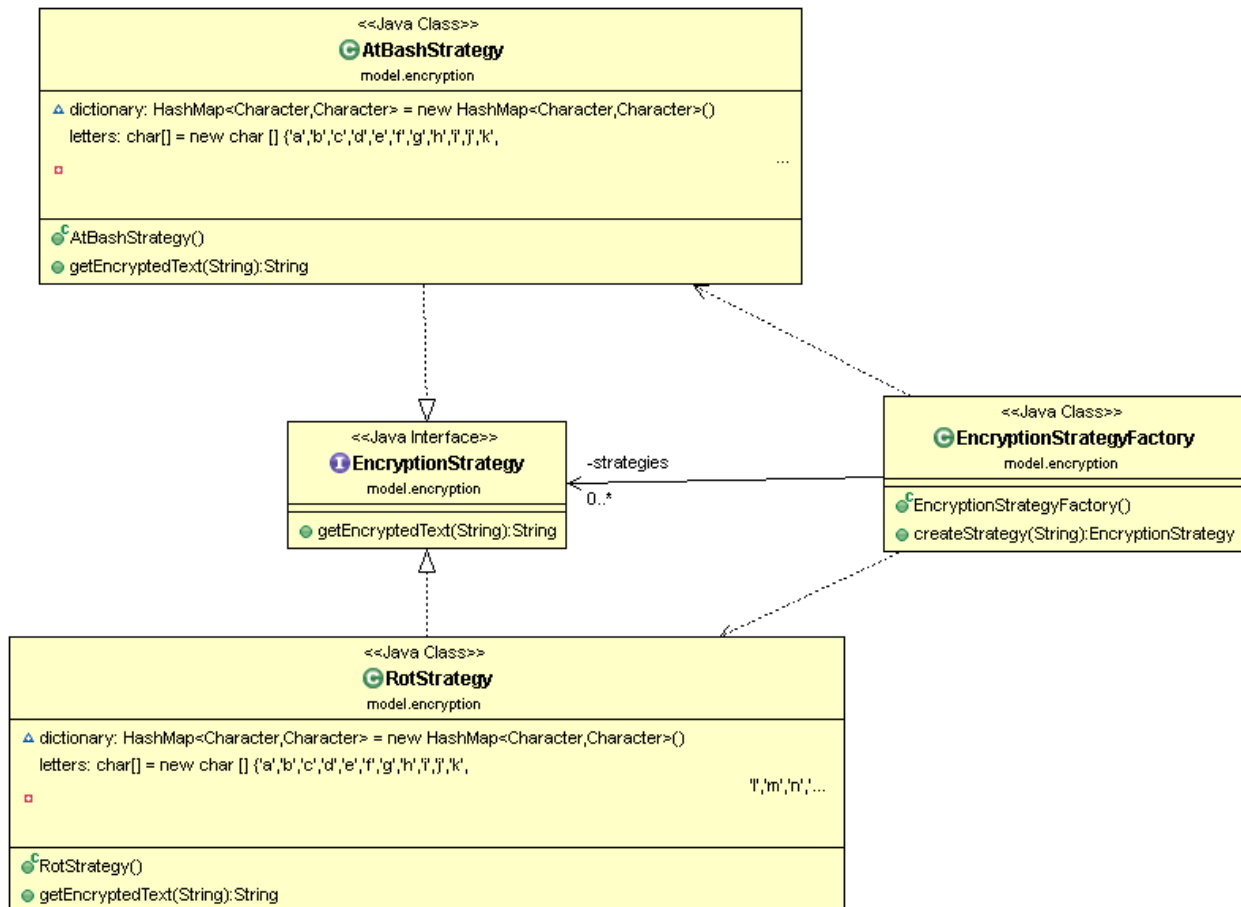

## UML class diagram for the package model:

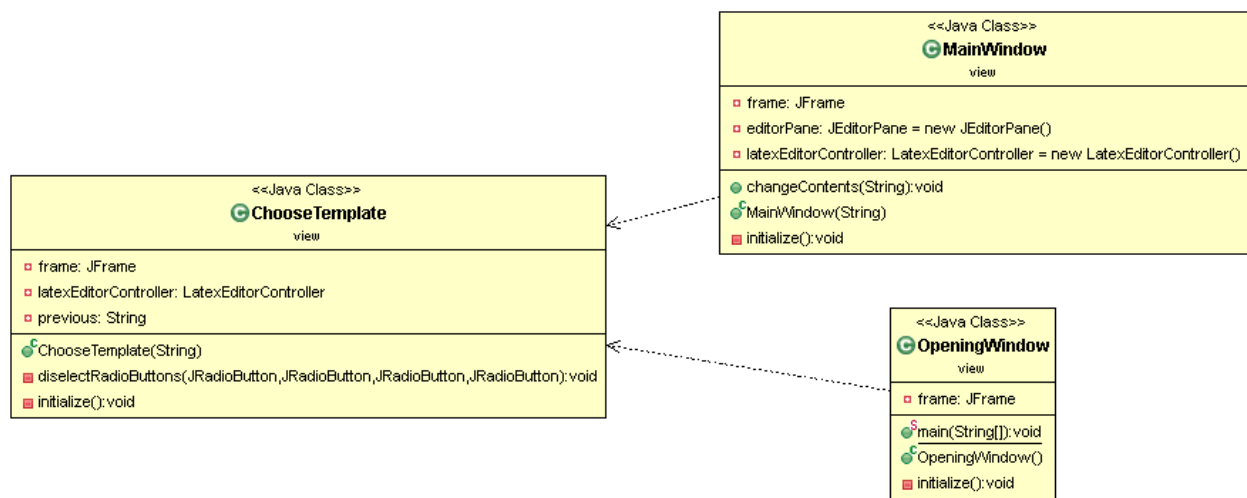

UML class diagram for the package model.strategies:

UML class diagram for the package model.encryption:

UML class diagram for the package view:

- *DocumentManager*: We have eliminated the duplicated code problem with the use of a HashMap. In the method “getContents” we moved the long strings at individual .txt files and used them from there.
- *VersionsManager*: We moved the necessary methods to the correct classes and eliminated the problem of the MiddleMan. We also removed the methods with DeadCode.
- *Commands*: We created an abstract class named GenerateCommands that implements the Command interface. Then we extended the Command classes from the GenerateCommand in order to use the fields of the GenerateCommand. With that, we have eliminated the DuplicateCode problem.
- *LatexEditorController*: We have moved every usefull class from the LatexEditorView to this class, in orded to eliminate the MiddleMan problem. We eliminated the problem of DuplicatedCode from the constructor with the use of a HashMap.
- *LatexEditorView*: This class was a general problem to the design of the program, so we removed it and moved all the methods and the fields to the classes: LatexEditorController, EditCommand, SaveCommand and LoadCommand.
- *MainWindow*: We moved the method “editContents” to the AddLatexCommand.
- *OpeningWindow*: We do not use anymore the LatexEditorController and we communicate directly with the MainWindow.
- *Encryption*: We have created the two new Classes SaveEncryptCommand and LoadEncryptCommand
- *CommandTests*: We updated the Test Commands to the new design pattern. Tests no longer use the LatexEditorView.

Class Name: LatexEditorController	
Responsibilities	Collaborations
<ul style="list-style-type: none"> <li>○ <u>This class is responsible for executing the required action by calling the “execute” method of the Command object.</u></li> <li>○ <u>This class creates a HashMap and stores the various Commands in it.</u></li> </ul>	<ul style="list-style-type: none"> <li>▪ <u>CommandsFactory</u></li> <li>▪ <u>Command</u></li> <li>▪ <u>MainWindow</u></li> <li>▪ <u>AddLatexCommand</u></li> </ul>
